General Closed Loop Optimal Solutions for Linear Dynamic Systems with Linear Constraints and Functional*

Paolo d'Alessandro   Elena De Santis

The authors have requested that the following corrections/changes be made in their manuscript. The summary of this paper appeared in Volume 6, Number 2, 1996. The changes occur only in the full length paper, which can be retrieved electronically (see footnote).

In equation 3.5, p. 4, replace W with $\hat{W}$

Page 10, first line/first replace *if $h > h$ then...* with *if $h > \bar{h}$ then...*

Pages 11–12 the following changes have been made in the numbering of equations.

> Page 11, first line, delete equation number (5.10) on the equation. The equation itself remains unchanged. Consequently, still on page 11, equation (5.11) becomes (5.10); (5.12) becomes (5.11); (5.13) becomes (5.12).

> Page 12, first line, the unnumbered equation should be numbered (5.13).
