

Staff Employee of the Week

Robin McCall-Miller

NAME: Robin McCall-Miller

JOB TITLE: Occupational Safety Engineer

HOME DEPARTMENT: Environmental Health and Safety

COLLEGE OR VP AREA: Vice President for Administrative Services

NOMINATED FOR: President's Award for Excellence

NOMINATED BY: Zachary Adams

SUMMARY

Robin provides exemplary support for safety compliance in both academic and administrative areas. She worked with faculty in Materials Science Engineering during their planning for the VT Fire foundry facility, including the development of its safety manual and training programs for faculty, staff and students. She provided extensive safety consulting, training and inspections during the planning for, and construction of, the Lumen House by the College of Architecture and Urban Studies. She has also spent significant time developing site specific safety training programs for the Center for Power Electronic Systems, the Warelab, the Powerplant, and other locations/operations. Her initiatives include development of web pages for individual work units where they can access their training records, hazard assessments and other safety-related information.

Robin maintains a 'can-do' attitude even while she has to respond to a significant workload of her own. She has excellent working relationships with persons in EHS as well as across the campus. She is respected by EHS's clients for her knowledge, skills and abilities. Clients know that if they call her, they'll get the right answer in a timely manner. Robin exemplifies, in so many ways, the university motto, Ut Prosim, 'That I May Serve.'
